Inferring the role of environmental reservoirs in the emergence of *Pseudomonas syringae* crop pathogens

Caroline L. Monteil  
Outgoing fellow 2013

Medical Microbiology and Infectious Diseases group  
College of Medicine, Swansea University, UK

Mentor Pr. Samuel K. Sheppard

caroline.monteil@hotmail.fr  
Agreenskills Annual meeting – Meteopole Toulouse - October 2014
In few words

SKILLS

- microbiologist

GENERAL RESEARCH INTERESTS

- ecology and evolution of bacteria

SPECIFIC INTERESTS AT INRA

- To understand the conditions associated with plant disease emergence and spread
Estimate the potential risk each bacterial population represent for crops

How different they are?
